SAIF JAMSHEER

+973 39162956 \\ +44 7491 551717 • saifjamsheer1998@gmail.com

CORE SKILLS

- **Programming:** Python, C/C++, MATLAB, Swift, Kotlin, Java, SQL

EDUCATION

University of Bath **Oct. 2016 — Jul. 2021**

MEng (hons) Integrated Mechanical & Electrical Engineering

- **Relevant Units:** Computational Intelligence, Digital Image Processing, Robotics Engineering, Integrated Engineering, Digital Systems Design

RESEARCH ACTIVITY

Deep Learning for Early Diagnosis of a Lung Disease **Nov. 2020 — Present**

- Developing a deep learning model for the early diagnosis of chronic obstructive pulmonary disease using a small dataset of CT scans.
- Utilizing a transfer learning approach to improve the overall performance of the model in detecting emphysema, chronic bronchitis, and refractory asthma.

Object Detection & Tracking for an Autonomous Racing Car **Oct. 2019 — Present**

- Designing a real-time deep learning object detection system in an interdisciplinary team of students for Team Bath Racing Electric's 2021 autonomous car.
- Using a YOLOv3 architecture and building on previous designs to detect and classify cones of different shapes and colors.

WORK EXPERIENCE

Software Engineer, Jaguar Land Rover **Jun. 2018 — Jun. 2019**

- Worked on the development of the Land Rover Comfort Controller application as part of an agile team of developers.
- Main responsibilities included UI and backend development using Swift and Kotlin, as well as automating essential tasks by writing executable scripts in Python.

Research Intern, Mumtalakat Holding Company **Jul. 2017 — Sep. 2017**

- Conducted research for the investment team to determine potential investment opportunities in areas such as technology, healthcare, and education.

ACADEMIC HONORS

Crown Prince's International Scholarship **Apr. 2016**

- One of only ten annual recipients of a full scholarship. The scholarship covers all tuition fees and living expenses for undergraduate and graduate education.

EXTRACURRICULAR

Team Bath Racing Electric **Oct. 2017 — May 2018 / Oct. 2019 — Present**

- Initially worked on the design of high voltage driver-assist systems.
- Transitioned to the AI division in 2019, where I am currently driving the research on deep automotive perception.

Peer Mentoring **Oct. 2017 — May 2018**

- Volunteered to mentor a group of first year students for one academic year.
- Helped with problem sheets in mathematics, digital circuits, and programming.
